MARKETING INFORMATION

TurtleJaws

LINE CLAMPS FOR FLEXIBLE HOSES

Selling Tips

1. Q: They are plastic - will they break?
A: They are a fibre reinforced industrial polymer. Each year more than 100,000 units are sold with a warranty rate lower than half of 1%.
2. Q: Why don't the jaws close fully?
A: Because if they did they could crush the internal walls of the hose.
3. Q: Why do I need these? I could just use my locking pliers.
A: Because locking pliers jaws close fully and, as a consequence, damage the hoses and as a further consequence may cause brake failure.

Technical

1. One handed operation
2. Adjustable closing pressure
3. Eliminates damage to hoses due to:
 - 3.2 Radiused jaw design
 - 3.3 Pre-set maximum crush
4. Light weight
5. Non-conductive
6. Bright colour - high visibility

Marketing

1. Very low cost
2. Variety of packaging options available
