

# UniTest Cooling System Pressure Tester Deluxe Kit

**Patented inflatable bladder attaches to radiator or header tank for system testing**

**The universal cooling system pressure tester that eliminates the need for system adapters**

BLADDER INFLATED

## Features

- Universal attachment to radiator or header tanks – Suits automotive, commercial, heavy duty, marine, motorcycle
- Fits bayonet and threaded filler necks on radiators or header tanks
- Fluid drain tube allows coolant to be returned to the coolant reservoir or safely collected in a container for recycling.
- Identifies cooling system pressure leaks
- Complete with 4 double ended adapters for testing 8 different radiator cap types.

## Specifications

- Pressure pump: 0-30 psi (0-207kPa) gauge
- Bladder is cycle tested to over 1500 inflations
- Suits neck diameters up to 45mm (threaded or bayonet)
- Max pressure: 30 psi

PATENTED

**Part No: 70888**

# Marketing Information UniTest Cooling System Pressure Tester Deluxe Kit

## Selling Tips

- Q: The bladder is made of rubber, will it burst?  
Why is there a spare in the box?

A: A specifically developed and patented rubber compound, which under normal conditions will last for many years. The spare bladder is included in the kit for the same reason that a spare tyre is included in a motor car so that in the unlikely event of failure, a spare is available to reduce downtime.
- Q: Too time consuming to fit to radiator/coolant bottle.

A: With experience, fitment time dramatically reduced.  
Given that in some cases, the kit is the same price as one adaptor of a competitor, why not have this unit simply for the less popular vehicles.

## Technical

- Suits most passenger and light commercial vehicles.
- System pressure bleed screw and overflow hose mean that pressure can be relieved safely and the coolant collected safely to comply with EPA regulations
- Can also be used for marine and motor cycle applications

## Marketing

- Very low cost when compared to all competitors. The table below lists a typical competitor situation.
  - 1.1 Typical competitor base kit + 9 adaptors = \$730.00 retail
  - 1.2 PBT kit = \$129.00 retail

NB: It should be noted that even with 9 adaptors, the competitive units do not suit anywhere near the range of vehicles of the PBT kit - competitive unit suits approximately 75% of vehicles.
- Whenever a new model vehicle is released, the garage is required to buy yet another adaptor.
- New adaptors for less popular vehicles can sometimes cost as much as the entire PBT kit.
